Experience

Full Stack Development Intern, Internselite |Remote
May 2025 – July 2025

- Contributed to full-stack web development projects using React.js, Node.js, and MongoDB
- Developed responsive, user-friendly UIs and integrated a RESTful APIs with backend services
- Participated in weekly Agile sprints, collaborating with mentors to deliver 6+ features
- Improved code maintainability by 30% by applying clean code principles and Git workflows

Projects

Airbnb Clone – Full Stack Web Application
March 2025 – April 2025

<https://airbnb-project-ena4.onrender.com>

- Developed a scalable Airbnb clone with listings, booking logic, and user authentication using JWT.
- Frontend built using React.js with React Hooks and modular components.
- Backend powered by Node.js and Express.js, serving 15+ API endpoints.
- Used MongoDB and PostgreSQL for schema-based and relational data models.

Doctor-Connect – Full Stack Website
June 2025 – August 2025

<https://doctor-connect-fronted.vercel.app/>

- Developed a full-stack telemedicine platform enabling real-time doctor-patient chat, appointment scheduling, and digital health record management.
- Implemented real-time booking notifications for doctors and patients to ensure instant updates on appointments.
- Built real-time chat, voice, and video calling features for seamless doctor-patient communication.
- Designed and implemented modern, responsive UIs for both patient and doctor dashboards using React and Tailwind CSS.
- Integrated secure authentication, role-based access, and JWT-based session management for doctors and patients.
- Built RESTful APIs with Node.js and Express for appointment, queue, and chat management.
- Implemented a floating AI chatbot for instant health queries.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt.js, Tailwind CSS, Socket.io, WebRTC, REST API, GIT, GitHub.

Rider-Go – Full Stack App
August 2025 – September 2025

<https://rider-go-web.vercel.app>

- Developed a full-stack ride booking system for users and captains using MERN stack.
- Implemented secure user & captain login with role-based protected routes using JWT.
- Created and documented 20+ RESTful APIs with Express.js for ride booking management.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt.js.

Skills

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS, Vite.

Backend: Node.js, Express.js, REST APIs.

Databases: MongoDB, Mongoose, SQL.

Tools & Platforms: Git, GitHub, Postman, JWT, Socket.io, WebRTC, bcrypt.js, Agile, Vercel, Render.

Education

Bachelor of Computer Applications (BCA)

Maharishi Markandeshwar Deemed to be University, Haryana

CGPA: 8.56/10

Senior Secondary (Science PCM)

R.N.S.H inter college, BSEB

2021 – 2023 | Percentage: **75.2%**

Secondary(10th)

R.N.S.H inter college, BSEB

2020 – 2021 | Percentage: **82%**

Achievements

- Winner, **Alpha Hack 2.0** – National Hackathon (Gold Medalist) – Jan 2025
- Successfully built a collaborative productivity tool in a 48-hour hackathon
- Built and deployed multiple full-stack projects independently

Hobbies

- Explore emerging tech like AI tools.
- Create browser-based games using JavaScript.
- Self-learner with passion for full stack development.

Certification

- MongoDB Certificate – MongoDB University
- Delta Full Stack Developer Program
- Web Development Job Simulation – Forage
- Frontend Engineering – Skyscanner (Forage)
- Auction Server with Express.js – Coursera
